The 2016 series begins on January 18, 2016 at 6:30 PM
Light Appetizers, Wine/Beer and Soft Drinks will be served from 5:30-6:30

“The Unexpected - And Sometimes Exciting - Impact Of Emulsions On Sensory, Formulation, Deposition And Delivery Systems”

J. Mark Chandler
President, ACT Solutions Corp
Prestige Clinical Instructor, UT CPPS

Emulsifier and emulsion structure selection is often downplayed or ignored in the development of skin care formulations. Once an active is selected, formulation should begin with choosing of emulsion structure. This is not common practice, but can revolutionize the ability of a formulator to design products that connect with the target audience on an emotional as well as a rational level. This approach can be integrated into an active delivery strategy, further enhancing the ability to design a product that will perform (and excite).

BIOGRAPHY:

Mark Chandler is the President of ACT Solutions Corp, a cosmetic and topical pharmaceutical industry consulting firm, focusing on Adaptive Aesthetic Design™, Advanced Emulsion Solutions, and Formulating for Efficacy™. In addition, he is a Prestige Clinical Instructor at the University of Toledo - College of Pharmacy and Pharmaceutical Sciences. Mark is in his 30th year in the cosmetic and pharmaceutical industry, most recently serving as Skin Care Applications Manager for Croda Inc (formerly Uniqema/ICI). For 15 years Mark has taught the Society of Cosmetic Chemists (SCC) Cosmetic Formulation course, in addition to instructing on emulsions for the Center for Professional Advancement and Cosmetic Raw Materials and Low Energy Emulsification courses for the SCC.
